# SAMUVEL ANBUDAVID

Project Lead | Senior Software Engineer
sam.a.bca@gmail.com | +91 9976714514 | Chennai, India
linkedin.com/in/samuvel-anbudavid | github.com/samuvel-anbudavid

## PROFESSIONAL PROFILE

Accomplished Senior Software Engineer and Team Lead with 7 years of experience in designing, deploying high-availability backend systems, and scaling full-stack enterprise applications. Strong expertise in Node.js, NestJS, and the MEAN Stack, with hands-on experience in RESTful APIs, GraphQL, microservices, and SQL/NoSQL databases. Experienced in frontend UI architecture with Angular, cloud infrastructure on AWS, and optimizing complex workflows using advanced Data Structures & Algorithms (DSA). Proven track record in transitioning monolithic systems to microservices, enforcing SOLID principles, and delivering major enterprise projects in high-pressure Agile environments.

## TECHNICAL SKILLS

**Primary Skills:** Node.js, NestJS, Angular (2+), Express.js, TypeScript, RESTful APIs, GraphQL, Microservices.

**Frontend Technologies:** Angular (2+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS.

**Backend Technologies:** Node.js, NestJS, Express.js, Microservices, RESTful & GraphQL APIs.

**Databases & Caching:** MongoDB, PostgreSQL, Redis, Database Modeling, Query Optimization.

**Cloud & DevOps:** AWS (EC2, S3), Docker, CI/CD, Kafka, Git, Linux Administration.

**Methodologies:** Data Structures & Algorithms (DSA), System Design, SOLID Principles, MVC Architecture, Design Patterns, Agile/Scrum.

## PROFESSIONAL EXPERIENCE

**Element5, India — Senior Software Engineer / Team Lead** — **Dec 2024 – Present**

**QBurst, India — Senior JavaScript Developer** — **Nov 2022 – Nov 2024**

**Doodleblue, India — Backend Developer** — **Nov 2021 – Nov 2022**

**Kaspon Techworks, India — Project Engineer** — **Jan 2018 – Nov 2021**

## KEY RESPONSIBILITIES

- Directed and mentored cross-functional development teams, leading rigorous code reviews and collaborating with Product/QA teams to guarantee seamless feature delivery.
- Architected and scaled robust full-stack automation and middleware integration platforms using Angular, Node.js, and NestJS.
- Applied strict SOLID principles and MVC architectural patterns to decouple core business logic, ensuring highly maintainable and extensible codebases.
- Leveraged advanced Data Structures & Algorithms (DSA) to optimize internal data-processing pipelines, scheduling queues, and real-time synchronization workflows.
- Optimized database queries, MongoDB aggregation pipelines, and Redis caching to reduce overall

## PROJECTS

**Auto Hub - Internal Project (Element5)** **Team Lead**

**Description:** Enterprise automation platforms requiring high-performance user interfaces and robust microservices architecture.

- Architected full-stack workflows using Angular (2+) for reusable frontend modules and enterprise Node.js/NestJS microservices.
- Applied advanced DSA to optimize internal data-processing pipelines and workflow scheduling queues.
- Optimized database queries and Redis caching, reducing overall system latency by 30%.

*Technologies: Node.js, NestJS, Angular (2+), Redis, Microservices, DSA.*

**LVMH Japan Region & Unlimited (QBurst)** **Senior Developer**

**Description:** Middleware platforms managing data ingestion and real-time synchronization between Salesforce and ERP systems.

- Managed a team of 4 engineers to build full-stack applications using NestJS and Angular.
- Leveraged custom trees and hash maps to handle real-time data synchronization and conflict resolution.
- Enhanced high-volume data retrieval by optimizing MongoDB aggregation pipelines and refactoring legacy code using SOLID principles.

*Technologies: NestJS, Angular, MongoDB, MVC, SOLID Principles.*

**Ripple Warehouse & Mozalo OTT (Doodleblue)** **Backend Developer**

**Description:** High-traffic streaming and logistics platforms requiring efficient inventory routing and supply chain automation.

- Developed core backend services and designed efficient inventory routing algorithms using advanced DSA, significantly reducing processing overhead.
- Integrated RESTful APIs with third-party logistics and ERP systems using PostgreSQL and MongoDB.
- Built reusable Angular components and optimized state management for internal admin consoles.

*Technologies: Node.js, Angular, PostgreSQL, MongoDB, RESTful APIs.*

**Swing Setter & Varanda Race (Kaspon Techworks)** **Project Engineer**

**Description:** Diverse enterprise applications requiring responsive dashboards and complex nested data structure management.

- Engineered RESTful APIs and high-performance Angular dashboards.
- Applied custom sorting, filtering, and tree-traversal algorithms on both the backend and frontend.
- Optimized legacy codebases across the full SDLC, achieving a 20% improvement in system stability and performance.

*Technologies: Angular, RESTful APIs, DSA.*

## EDUCATION & CERTIFICATIONS

- **Degrees:** MCA & BCA — Bharathiyar University, India
- **Certifications:** Back End Development & APIs (freeCodeCamp), Advanced SQL (HackerRank)
- **Languages:** Tamil (Native), English (Professional Proficiency)
